

# Sharing the knowledge

The recent extended leadership events highlighted issues relating to knowledge sharing and management. This is something that Dounreay's new knowledge manager, James Gunn, will be looking at

Over the coming months, James will be assessing Dounreay's current methods and practices for knowledge sharing.

James said: "Dounreay's most valuable asset is its people, and it's important to have appropriate arrangements in place for managing and sharing information."

# Supply chain in the spotlight: Gows Lybster

## Gow's Lybster Ltd is a local design, engineering, fabrication and installation company

The company is a framework contractor to the site, and has recently been awarded two large contracts on site. They will be working on the conversion of D3110 to an intermediate waste store, and the D1208 Ammonium Diuranate (ADU) Floc project.

**Sandra Gow**, Director, said: "Having an esteemed presence in the Highlands, we are able to supply a wide range of products and services to the nuclear decommissioning, oil and gas and developing renewable energy and infrastructure sectors of industry."

"We provide a diverse range of engineering services all carried out by an established and extremely competent workforce who we see as one of the key drivers to successful and quality driven project outcomes."

For nearly 30 years Gow's Lybster has been training apprentices and is currently nurturing four apprentices who are all working to SVQ Level 3 in Engineering.

Sandra continued: "We will continue to turn out first class personnel as part of our role supporting the decommissioning of Dounreay, and look forward to working together to deliver these projects on time and to budget."

*"We will continue to turn out first class personnel as part of our role in continuing to support the decommissioning of Dounreay"*
